Operation

■ Insert batteries

Open the tail cap, and insert batteries properly with "+" towards the head.

■ Lock and unlock

A. Lock: in the unlocked state, anticlockwise rotate switch 45°to get it locked.

B. Unlock: in the locked state, clockwise rotate switch 45°to get it unlocked.

■ Power indicator

Battery power	Power indicator	Solutions
>20%（sufficient)	Green	Under good condition
20%-5%（nearly low)	Red	Please charge timely
<5%（low)	Red flashing	Please charge timely or it will power off 10min later

■ Use accessories

A lanyard can be attached to the tail of light; also a mounting hole for handle or joint ball is placed on the housing.

■ Tips

1.Please make sure that batteries "+" are towards the head.
2.Since the light will consume power after power off, please remove batteries when not planning to use the light for some time.
3.Do not wipe batteries with any corrosive material.
4.Light fails to start.

Possible causes	Solutions
Battery is out or not compatible	Change batteries
Batteries improperly placed inside	Make sure that batteries "+" are towards the head
Poor contact	Clean the contact surface of batteries with alcohol Tighten the head or tail cap
