

Polyimide silicone tape HT-2550

Technical data

Product Description:

2550 is a high temperature resistant single-sided pressure-sensitive adhesive tape coated with a silicone film as a substrate this product is suitable for the shielding application of the SMT industry;

Typical application :

PCB board gold finger shielding protection

Insulation protection

Substrate PI film

Color: brown

Standard: Any width -mm*33m 66m 100m

Total thickness:0.05mm±0.005mm

Product performance

Peeling force (for steel plate) : Min 4.5N/25mm. width PSTC-101

Tensile Strength :Min 115N/25mm. width PSTC-31

Elongation at break: Min 50% PSTC-31

Breakdown voltage: Min 4.0Kv PSTC-51

High temperature resistance: 250°C
